Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Duffin (U.S. Pat. 5,752,976). Duffin discloses a world wide patient location and data transmission telemetry system for implantable medical devices that show all the features of the claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duffin in view of Mann (U.S. Pat. 6,554,798). Duffin does not show an infusion pump to infuse insulin and a glucose sensor. Mann discloses an infusion device with remote programming, bolus estimator and/or vibration alarm that shows infusing insulin and a glucose detector. It would have been obvious to one of ordinary skill in the art to use an infusion pump with a glucose detector as

Art Unit: 3742

taught by Mann because the infusion can infuse insulin into a body based on a detected glucose level.

Claims 9-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duffin in view of Lanzl et al.(U.S.Pat.6,353,406). Duffin does not show variable bit patterns and variable preamble lengths. Lanzl discloses a dual mode tracking system that shows variable bit patterns and variable preamble lengths. It would have been obvious to one of ordinary skill to incorporate the variable bit patterns and preamble lengths as taught by Lanzl because the variable bit patterns allows more data types to be sent and the variable preambles allows the receiver to know what kind of data is being transmitted.

Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over the modified Duffin reference as applied to claims 9-18 and further in view of Wertnicke et al.(U.S.Pat.5,231,988).

The modified Duffin reference does not show a wait and hold type data reception system. Wernicke discloses a treatment of endocrine disorders that shows a parity, parity check and hand shaking system. It would be obvious to one of ordinary skill to adopt a data reception system as taught by Wernicke for data integrity.

Art Unit: 3742

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fletcher, Pollack, Schulman and Schulman'344 are cited to show structure and methods similar to the claimed invention.
